
SOVA™
SECURITY PLATFORM
Security that moves with your property.
A unified platform that connects people, places and operations to keep your property safer, more responsive and more efficient.
Real-Time Awareness
Intelligent Patrols
Actionable Insights
Connected Operations
GRANDVIEW
HOTEL & RESORT
Live Dispatch
Coordinate response in real time
SlamTrak™
Indoor positioning and movement
Smart Tours™
Adaptive patrol recommendations
Incident Insights
Identify risks and emerging patterns

THE PLATFORM PHILOSOPHY

Beyond documentation. Toward proactive security.

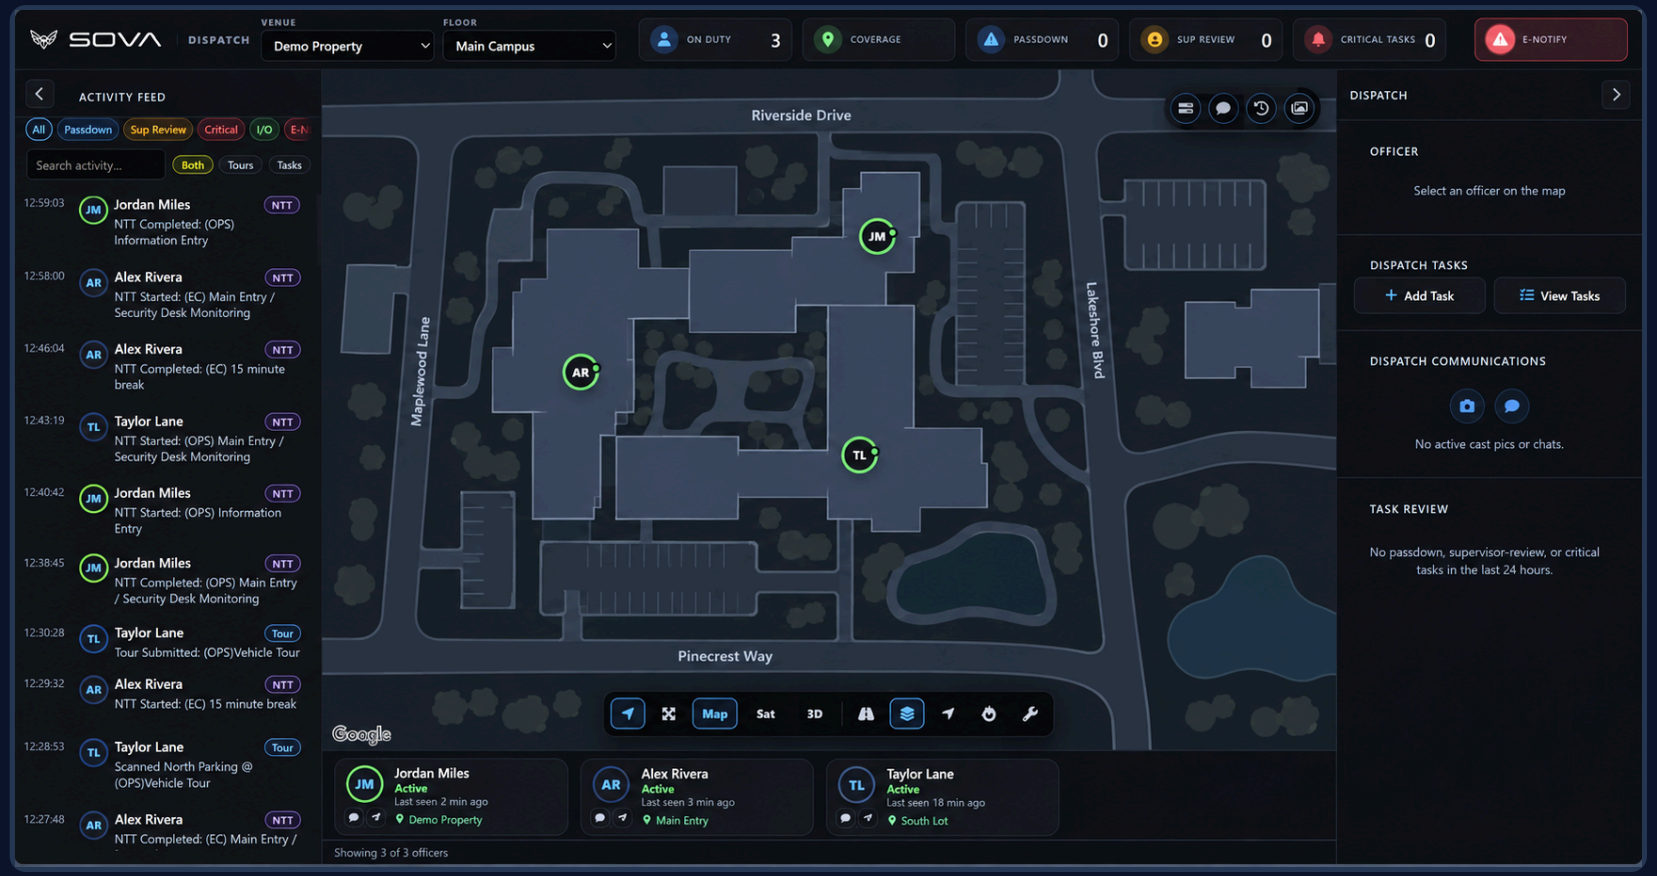
Security conditions change throughout every shift. SOVA connects frontline activity, dispatch and management intelligence so teams can respond to changing operational needs.

01 DOCUMENT Capture verified activity.

02 UNDERSTAND Identify coverage and risk signals.

03 ACT Bring recommendations into the workflow.

Your entire security operation.
In real time.



SOVA Dispatch / anonymized demonstration illustration

Live awareness

See officer locations and activity as it happens.

Two-way communication

Message officers and receive live video from the field.

Coordinated response

Assign tasks and review critical operational activity.

Know where your officers are.
Not just on a map.

Three-dimensional awareness

View officer positions across building levels and zoom into mapped floor plans.

Movement history

Review recorded officer movements and activities in sequence with UserTrak.

Indoor positioning

SlamTrak™ uses fused signals to build site-specific location fingerprints.

Concept illustration. Indoor accuracy of approximately 5 m depends on site conditions, CAD drawings and SlamTrak setup.

When every second matters.
Coordinate the response.

Concept illustration / fictional operational environment

Targeted notifications

Templates prepare messages and select recipients using site-defined rules.

Multichannel delivery

Send email, SMS and optional automated voice calls; monitor answered calls and voicemail.

Executive coordination

Invite designated leaders to an optional command conference during major emergencies.

From assignment to action.
Connect dispatch and the field.

Concept illustration / mobile interface is illustrative, not a product screenshot

Immediate assignments

Select frequently used activities and send tasks directly to officers' mobile devices.

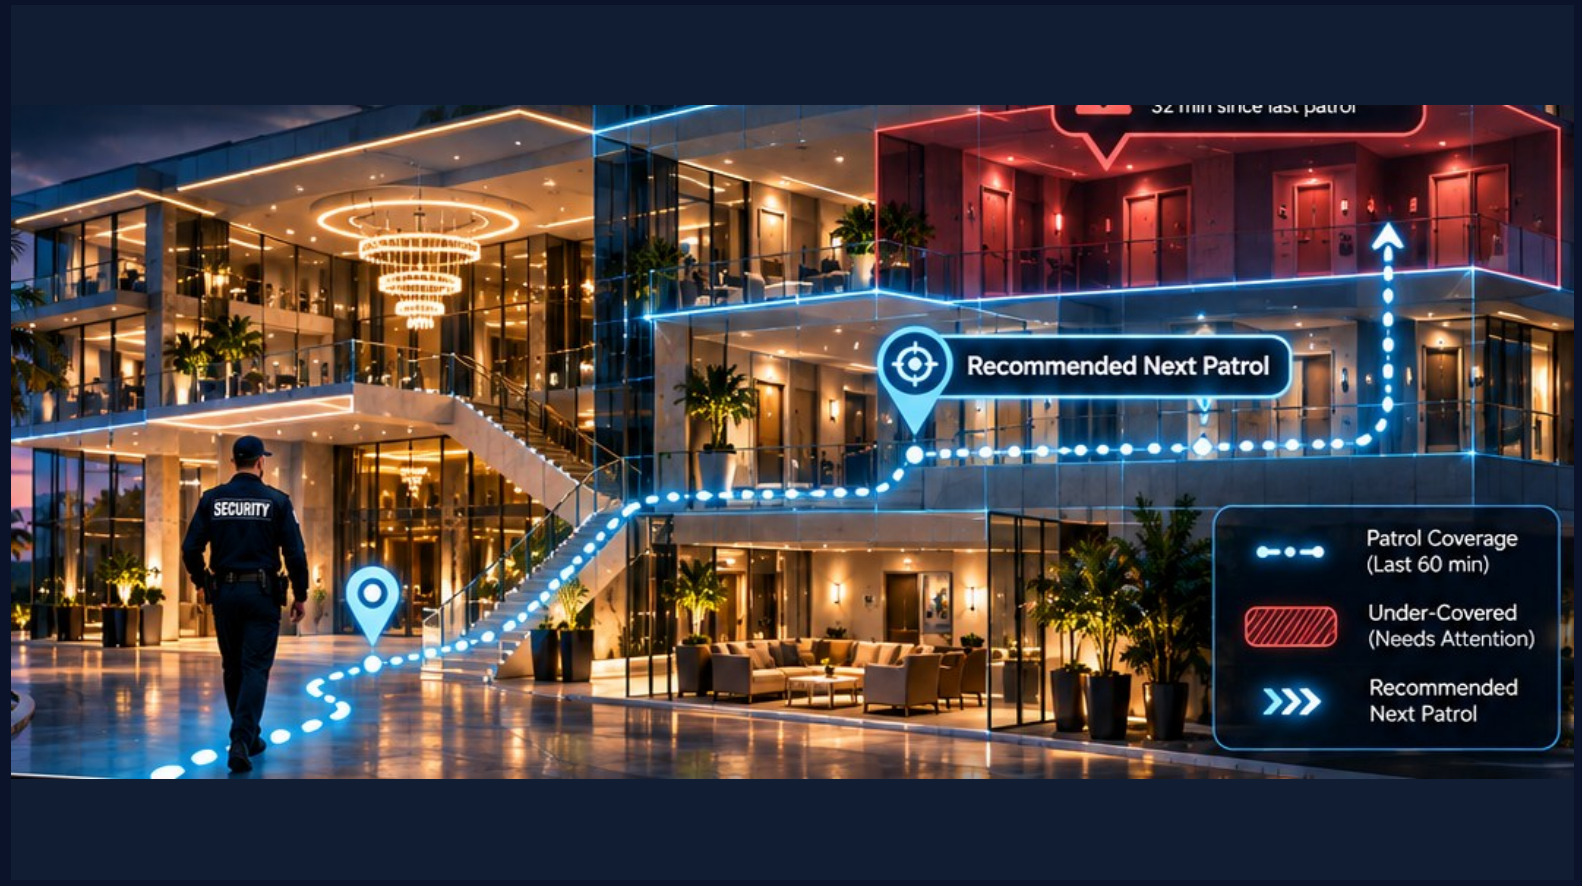
Recurring schedules

Assign to an officer or pool using shift, time and calendar-based rules.

Accountable execution

Officers accept or decline according to business rules; record activity and completion.

The next patrol should be determined by need. Not habit.



Concept illustration / interface and figures are illustrative, not actual customer data

Coverage comes first

Rank existing tours using overdue intervals, daily minimums and recent coverage.

Context matters

In Full Smart mode, mapped incidents, manager rules and officer proximity influence priority.

Officer-led execution

The Guard app presents a recommendation and reason. Officers accept before starting; due inspections can be included.

When conditions change, your patrol strategy should too.

Surges

Temporarily prioritize patrol attention within a defined area or event perimeter.

Boost rules

Apply weighted priorities to tours, checkpoints or venues during configured time windows.

Operational protocols

Use scheduled profiles for events, weekends and changing operational conditions.

Concept illustration / interface and figures are illustrative, not actual customer data

Predictable patrols create predictable vulnerabilities.

Measure predictability

R-Score evaluates start times, dwell and checkpoint sequence. Lower scores indicate more variation.

Feedback in the field

Officers receive real-time feedback and can adjust how they conduct patrols.

Coach with evidence

Supervisors review scores alongside checkpoint completion and tour performance.

Concept illustration / interface and figures are illustrative, not actual customer data

Every incident tells a story.
Together, they reveal patterns.

Concept illustration / interface and figures are illustrative, not actual customer data

Understand patterns

Review incident types, locations, time-of-day concentrations and trends.

Prioritize review

Surface high-risk incidents, aging drafts and reports awaiting approval.

Explore deeper

AI Insights supports further analysis; mapped incident signals can inform Smart Tours.

Your security operation.
Now in a conversation.

Two voices, one overview

AI personalities summarize the day's recorded activities in a conversational audio format.

Listen on your schedule

Consume the briefing during a commute or while multitasking.

Keep stakeholders informed

Daily Activity Reports can also be distributed automatically to stakeholders.

Concept illustration / interface and figures are illustrative, not actual customer data

Knowing what happened is only half the job.

Measure performance

Review tour hours, task activity, checkpoint completion and officer performance.

Find recurring gaps

Drill into missed checkpoints by tour, officer and date range.

Move from review to action

Smart Tours uses coverage timing to recommend the next patrol, reducing reliance on manual review.

Concept illustration / interface and figures are illustrative, not actual customer data

Beyond guard tours.

One platform for the broader security operation.

Connect incident reporting, visitor badging, equipment, lost and found, notifications, inspections and shift activity.

SOVA
SECURITY PLATFORM
Connected Security Operations
One platform that brings your people, activities and information together—so your team can respond faster, operate smarter and maintain complete visibility across your property.
Dispatch
Coordinate people, tasks and immediate response.
Reporting
Turn operational activity into actionable intelligence.
Patrols
Intelligent, risk-based tours that adapt to real-world conditions.
Smart Tour
Lobby
Parking
Perimeter
SOVA
SECURITY PLATFORM
Inspections
Standardized checks for safety, compliance and asset readiness.
AED
Incidents
Capture, manage and investigate events with complete documentation.
A Unified Workflow
From dispatch to resolution, all in one system.
Real-Time Visibility
Know what's happening, where and what to do next.
Greater Operational Control
Reduce risk, improve response time and demonstrate due diligence.

Ask. Understand. Act.

Imagine asking your agent for a weekend security review, without opening a dashboard.

Authorized access to SOVA data could turn a natural-language request into an executive brief.

IN DEVELOPMENT

Illustrative future capability.
Example figures are fictional.

Let’s talk security.

Discover how SOVA can support your property and your team.
